For Immediate Release (document #wssv10)

What’s FREE? SharePoint Services at an affordable price.
“by popular demand”

Lincoln, RI (July, 2008) – ITLNOW Inc., announces a new application developed specifically for existing Microsoft Server 2003-2008 Standard, Small Business 2003 or Enterprise Server Edition 2003-2008. This solution allows organizations to quickly provide Intranet/Extranet capabilities for their staff, employees, students, teachers, parents, customers, clients and vendors. This is an excellent way to establish a true workflow and collaborative way to manage people, information and projects with Microsoft Office 2003. The following is a brief overview of our solution and technology. Call us for a free quote.

Microsoft SharePoint Service Project

Install and Setup Windows SharePoint Services as a Collaborative File Store on an beta server (a beta server can be provided as part of the project “get to know the system” running on MS Server 2003 -2008 Domain Controller with MS SQL 2000 SP4, SQL Server 2000 - 2005 Personal Edition or SQL Server 2000 2005 Desktop Engine (MSDE 2000-2005)
